

NIYAZOV SARVARJON

Junior Full Stack Developer | JavaScript | React.js | Node.js

+82 10-7348-4884 sarvarjonniyazov833@gmail.com https://github.com/sarvarjon-833 South Korea, Busan

SUMMARY

Highly motivated Junior Full Stack Developer with a solid foundation in frontend technologies (JavaScript, React, Tailwind CSS) and expanding expertise in backend engineering (Node.js, Express, MongoDB). Passionate about building seamless, user-centric web applications and robust database architectures. Eager to leverage software engineering skills to support international organizations focused on science, nature, and wildlife exploration.

PROJECTS

Natours - Nature Tour Booking Platform

Node.js, Express.js, MongoDB, Pug

06/2026 - 07/2026

- Engineered a comprehensive server-side rendered web application tailored for booking wildlife and nature tours, seamlessly integrating robust technical solutions with environmental exploration themes.
- Architected a secure RESTful API using Node.js and Express.js, implementing advanced backend features including JWT authentication, role-based authorization, and global error handling.
- Designed complex data models and utilized geospatial queries with MongoDB and Mongoose to efficiently manage and filter tour data, user reviews, and geographical locations.
- Developed dynamic, SEO-friendly user interfaces utilizing the Pug templating engine, successfully bridging server-side logic with frontend presentation.

AI Writer - Full Stack Application

TypeScript, React.js, Tailwind CSS, Node.js, Express.js, MongoDB

03/2026 - 06/2026

- Engineered a full-stack AI content generation platform, heavily utilizing TypeScript (comprising 84% of the codebase) for enhanced type safety, scalable architecture, and code maintainability.
- Developed a dynamic and responsive frontend interface using React.js and Tailwind CSS to ensure a seamless and intuitive user experience.
- Built a robust RESTful API backend using Node.js and Express.js, implementing a clean separation of concerns between frontend and server-side environments.
- Integrated MongoDB for efficient data storage and retrieval, ensuring secure handling of user requests and generated content.

CERTIFICATES / COURSES

Node.js, Express.js, MongoDB & More: The Complete Bootcamp

Issued by Udemy, 2026

- Mastered backend architecture, secure REST API development, authentication, and complex data modeling utilizing Node.js, Express, and Mongoose.

Frontend Web Development- React.js

Issued by Mohirdev, 2025

- Developed comprehensive frontend expertise utilizing HTML, CSS, Sass, Bootstrap, JavaScript (Advanced), and TypeScript. Built dynamic web applications with React.js and Next.js, integrating Supabase and Git version control.

EDUCATION

Degree in Automotive Engineering

Seojeong College

03/2024 - 07/2026 South Korea, Seoul

LANGUAGES

Uzbek

Native

English

Advanced

SKILLS

Frontend

JavaScript (ES6+)

TypeScript

React.js

Next.js

Tailwind CSS

Sass/Bootstrap

HTML5/CSS3

Backend & Database

Node.js

Express.js

MongoDB/Mongoose

Supabase

RESTful APIs

Tools & Version Control

Git/GitHub

Pug (Templating)

GitHub Copilot

Interests

Passionate about leveraging software engineering to support international initiatives focused on science, nature, and wildlife exploration. Driven by a desire to build innovative digital solutions that contribute to environmental awareness and global scientific discovery.
